

# Twice as good: ironing and steam cleaning.

Apart from floor cleaning, ironing is the main area of application for a steam cleaner. For this reason the SI 2125 steam ironing system offers the maximum level of user friendliness. The time-proven SC 1125 universal steam cleaner and the redesigned AB 1000 active steam ironing table combine to provide a unique concept. Ironing and cleaning with only one machine.

### Active steam extraction

Improved steam penetration of the fabric thanks to active steam extraction provides an optimal ironing experience. Furthermore, the process of extracting the steam dries your laundry sufficiently so that it is ready to put in the closet.

### With blower function

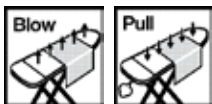

Even difficult fabrics are really easy to iron on a cushion of air that guarantees a crease-free finish.

### Iron 50% more quickly

The consistently high steam pressure of the SC 1125 makes ironing easier – even with heavy fabrics. This saves up to 50% of your time.

### For all areas

The SI 2125 includes extensive accessories for steam cleaning. This makes the machine a steam cleaner with numerous possible applications.

**AB 1000**

■ Ironing table with blower function and active steam extraction

**SI 2125**

■ Ironing board with blow-up function and active steam extraction  
 ■ SC 1125 steam cleaner with a range of accessories  
 ■ Steam iron with easy glide stainless steel soleplate
