

Sweeping – five times faster than with a broom.

Sweeping can be this easy. With Kärcher sweepers you can quickly clear the dirt of paths, driveways and patios. All outdoor surfaces gleam in a renewed splendour within a very short period of time – without having to strain yourself by bending over. No broom can do this.

1 Quick, quicker, Kärcher

With our sweepers one can clean up to five times more quickly than with a broom and dustpan. Using the machines is child's play.

2 Broom and dustpan rolled into one

The rotating brush of the battery-driven sweeping machine K 85 safely sweeps bulk waste into the waste bin. Even sand, dust and pebbles are easily swept up.

3 Sweeping is as easy as it gets

The battery-driven sweeping machine K 85 makes sweeping much easier; strenuous bending is now a thing of the past.

4 State-of-the-art lithium ion technology

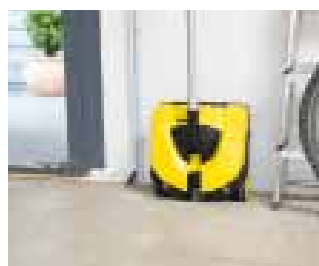

Due to battery operation, the sweeper K 85 permits quick and flexible use. The efficient lithium ion battery offers increased power at reduced weight; there is no spontaneous discharge or memory effect. Moreover, the charging times are shorter than those of conventional batteries.

Clean up quickly.

With the rechargeable K 85 you can quickly and easily sweep small to medium-sized areas such as balconies, patios, garages, driveways or small paths around the house. The innovative, moveable brush system of the K 85 adapts to all types of uneven ground, leading to clean results.

Neatly stowed

Space can be saved with the K 85's vertical snap-in handle and its upright position.

Saving strength

The battery-driven roller brush, smooth-running wheels and light weight make sweeping child's play.

Cleanliness all around

Thanks to the flexible brush system the K 85 is able to cope with uneven terrain and can even sweep along the edges as close as 5 mm.

Extremely flexible

If the battery is fully charged, the K 85 is ready for action immediately – without any preparation or annoying cables.

K 85 Li-Ion

- Durable lithium-ion battery
- Flexible roller adapts to uneven ground

Faster than a broom.

Who would have thought that sweeping by hand could be so easy? With Kärcher sweepers sidewalks and streets as well as driveways and yards can be cleaned up to five times more quickly than with a broom and dustpan. The swept up material is reliably collected in the sweeping container: simple, fast and clean. This is how to sweep today!

Practical and compact

All sweepers can be quickly stored in a minimum amount of space: Simply fold down the push handle and stand the sweeper upright against a wall.

Stands on its own

The waste containers can be quickly removed and are designed so that they stand on their own.

Wide and strong

With the powerful, 45 cm wide sweeping brush and the large side brushes, the S 650 reaches a working width of 65 cm. The extra long bristles of the side brush also thoroughly sweep edges and corners.

Powerful and convenient

The ergonomic push handle of the sweepers can be height-adjusted and can be completely folded away as necessary. This makes it possible to store them in a tight space.

S 550

- Adjustable push handle
- Stowage position
- Stand-up waste container

S 650

- Adjustable push clamp with ergonomic push handle
- Stowage position
- Two side brushes
- Stand-up waste container

S 750

- Adjustable ergonomic push handle
- Stowage position
- Adjustable contact pressure of side brush
- Stand-up waste container
