

# The premium range – steam cleaning and vacuuming in one.

Home cleaning

Kärcher steam vacuums unite the advantages of steam cleaners and dry vacuum cleaners. They vacuum e.g. crumbs from the floor and wipe them away with moisture. With these general purpose machines and corresponding accessories anyone can have his or her household under control – simple, comfortable, quick and without chemicals.

### Without having to change filters at all

The vacuumed fluid and the dirt are retained in a water filter and then later emptied.

### Everything in one step

Kärcher steam vacuums can vacuum, steam-clean and dry. They are ideal household cleaners, even for large areas of tiles, natural stone and PVC.

### So that everything goes smoothly

The special rubber bladed adapter cleans windows, tiles, mirrors and other smooth surfaces in one go.

### Full steam ahead

Dry steam dislodges dirt and neutralises unpleasant odours that are immediately absorbed.

SV 1802

SV 1902

- Steam vacuuming, wet and dry vacuuming, steam cleaning, window cleaning
- Efficient 4-stage filter system
- Can also be used as ironing station when equipped with optional accessories
