

Industrious helpers.

There are two ways to get even more from the already impressively powerful Puzzi: professional brushes and air blowers. The professional brushes increase the power of the Puzzi by up to 30% with the same improvement in cleaning results. The already very brief drying time can be shortened by up to an additional 40% with the powerful AB 84 air blower. An ideal solution for drying water damage or for construction.

PW 30/1 and PW 20

The professional brushes with motor-driven brushes increase the cleaning power of the Puzzi machines by an additional 30%.

Convenient portability

The AB 84 is easy to move with its wheels and push handle. The handle can be folded down.

Fresh wind for drying

The AB 84 air blower shortens the drying time of spray-extracted or shampooed carpets by up to 40%.

PW 20

- Motor-driven brush
- Power brush for Puzzi 400

AB 84

- Practical three-stage switch
- Integrated power cable holder
- Chassis with fold-down handle

For those quick occasional carpet cleanups.

Carpet cleaning machines remove dirt and freshen up carpets. Carpets dry and can be walked on again after around 20 minutes. The machine cleans up to 300 m²/h, which makes it suitable for large areas, too.

System solution

The cleaning agent RM 768 iCapsol is sprayed onto the carpet and is evenly distributed. It encapsulates the dirt and after approx. 20 minutes it can be vacuumed.

Deep cleaning

Two rollers running in opposite directions clean the carpet gently while straightening fibres.

Effective

The machine picks up particles lying on the carpet and collects them in a removable pan.

Simple and robust

The controls are simple, reliable and easily understood. The robust build of the machine also means it can withstand hard knocks.

BRS 43/500 C

- On-board iCapsol tank
- Counter-rotating rollers ensure machine does not wander
- With sweeping attachment

Technical data

Area performance (interim cleaning iCapsol)	m ² /h	300

For the effective cleaning of large carpet surfaces.

These carpet cleaning machines are used in all those areas where large areas of carpet have to be deep-cleaned economically. Apart from conventional spray extraction, these units are also suitable for interim carpet cleaning in conjunction with the new RM iCapsol cleaning agent.

Fibre-deep cleaning

The BRC 30/15 C is equipped with a float-mounted roller brush. This ensures consistent cleaning.

Different ways to use to machine

The BRC 45/45 C is equipped with a fold-out push handle. This makes cleaning possible forwards or backwards.

High quality

The machines incorporate carefully selected high-grade components to ensure reliable operation.

High surface capacity

Apart from a float-mounted brush head, the BRC 50/70 W also features two counter-rotating roller brushes.

BRC 30/15 C

- Compact, for small to medium-sized areas
- Direction of operation: backwards
- One roller brush with constant contact pressure

BRC 45/45 C Ep

- For medium-sized clear areas
- Direction of operation: either forwards or backwards
- Two counter-rotating roller brushes with constant contact pressure

BRC 50/70 W Bp/Bp Pack

- For large and very large areas of carpet
- Direction of operation: forwards with own drive
- Detergent metering from separate tanks
