

Snow throwers.

Kärcher snow throwers, from the basic to professional model, are fast, convenient and efficient. Their 4-stroke engines deliver high power while being fuel efficient and ensuring trouble-free cold starts. The two-stage snow thrower operates separately with a snow pull-in and discharge to provide a high clearing capacity, even in deep and hard-packed snow.

Clever snow throwing system

The two-stage snow thrower operates separately with a snow pull-in and discharge to provide a high clearing capacity, even in deep and hard-packed snow.

Easy to use

The clutch-lock system with lockable lever allows one-hand operation. The traction drive and snow throwing distance are controlled using a hand level.

Space-saving storage

The push handle can be easily folded downward, reducing the amount of space the machine takes up in storage.

Reliable engines

The rugged, fuel-efficient 4-stroke engines deliver plenty of power and have exceptionally good cold-start characteristics.

STH 5.56 W

- Two-stage thrower
- Manual start

STH 8.66 W

- Clutch-lock system
- Two stage thrower
- Electric starter (230 V)

STH 10.66 W Crt

- Clutch-lock system
- Crawler track drive
- For uneven/icy terrain
