

Fast and continuous steam cleaning.

Time is money – this is especially true in commercial cleaning. The more reliable and flexible the machine, the higher the cleaning power. The DE 4002 features an ingenious filling method and operator comfort that makes it especially economical for commercial use.

Two-tank system

Heating-up time is very short because only a part of the total tank capacity has to be heated.

Continuous operation

The unit can be refilled with water during operation without having to wait for it to cool down and then be reheated.

Vapo Hydro

Infinitely variable regulation from steam up to a hot water jet situated on the machine.

DE 4002

- Filler funnel for 2-tank system
- Short heating-up time
- With built-in pump for continuously filling the boiler

Technical data

Voltage	V	230
Heating output	W	2250
Tank capacity	l	2.2–2.4
Length of cord access.	m	7.5
Steam pressure	bar	3.2
Weight without access.	kg	7.5
Dimensions (L x W x H)	mm	480 x 305 x 265
